Spring Is Here --- Robins Are Back

Spring hats in the store windows, slush and melting snow underfoot, but the surest sign of spring's advent—the Robins are back.

Not one of two hardy adventurers pioneering into the north from a land where worms perpetually wiggle a few inches below the soil, but whole flocks of the red-breasted gentry chortling from the shrubbery and singing their evening vespers from the treetops, have been observed.

Over the week-end, robins were reported from a score of sections through the city, vanguards of the later influx which will make their home in gardens and parks throughout the summer.

LOCAL NEWS

Prize winners in the local bonspiel held last week were:
Grand Challenge Event

1st Cooley's rink consisting of Mrs. Cooley, G. Anderson, J. Bayley; 2nd Gingles rink consisting of Mrs. Gallagher, Misses Otto and DeMaere; 3rd Barros rink consisting of M. Seeger, E. Barry, H. Cornell; 4th Morrell's rink consisting of J. Lee, F. Milligan, J. Gilbertson.

Merchants' Event

1st Morrell's rink; 2nd Barros rink.

Consolation Event

1st Milligan's rink consisting of L. Barros, Florence Barros, E. Sawyer; 2nd Robinson's rink consisting of G. Wanner, G. Anderson, M. Maurer.

POSTPONED WATCH FOR DATE

Moving Pictures

A moving picture showing will be held in Chinook School. List of films include two technicolor films. Subjects are travelogues, news and special comic for the children. Proceeds will be used for the purpose of placing a radio in the school to take benefit of the educational broadcasts sponsored by the Department of Education.

Admission: Adults .25c
High School .15c
Children .10c
Under the auspices of the Chinook Intermediate Room.

Prepare To Exterminate Hordes of Grasshoppers In Early Growing Season

Southern Alberta is preparing for war—with grasshoppers. Government officials announce they have arranged storage facilities for several cars, possibly 100 tons, of sluosilicate.

That is the lethal part of the mix, sometimes called bait scattered through fields when the infant hoppers start their destructive work shortly after being hatched. Officials said the poison, when converted to a liquid and mixed with bran and sawdust, should be sufficient to poison every insect in Southern Alberta.

The poison, now on its way from Europe, is expected to be cleared through Vancouver and will be stored here until snb stations throughout the south open in the spring. The stations themselves have some small amounts of material left over from last season. To go along with the sluosilicate there are at present about 1,000 tons of sawdust stored in east Calgary and more being added from time to time. The idea this year is, with the co-operation of farmers, to have everything in position for a concentrated campaign at the first signs of an outbreak.

While awaiting maps, or charts, from Ottawa showing the areas where infestation is expected to be the most severe unofficial opinion is that the 1939 campaign against the 'hoppers will cover a larger area than last year, though the outbreaks may not be as severe in any particular region.

The surveys last fall indicated moderately heavy deposits of eggs as far north as Didsbury, with the western boundary of infested territory slightly further into the foothills.

Calgary district, unless the spring is exceedingly damp and cold, may expect an outbreak, though it may not be very severe.

WEEK END SPECIALS

Washed & waxed Turnips 8 lbs	.25c
" " Carrots 6 lbs	.25c
Fancy Wrapped Apples 4 lbs	.25c
Lemons large per doz	.40c
Oranges medium size 3 doz	.45c
Tomatoes 7 tins	\$1.00
Fels Naptha Soap per bar	.09c

BANNER HARDWARE AND GROCERIES

Round About Town

SEEN BY US

Did you see the two pair of lovers who were out enjoying springs first breath on Saturday? We believe that a walk in the fresh air is most refreshing but didn't you realize how cruel you were in shooting the innocent birds and pigeons.

Where did two girls from Railway Avenue go to on Saturday? It appears that they enjoy bus rides if one can judge from the happy twinkling expression we saw in their eyes and in the eyes of the bus driver.

We saw a small procession going eastward by the Garage on Sunday afternoon. We were wishing we could join them but that would have been rude intrusion on our part.

One young lady in the country lived on clouds of happiness over the week end. Her most ardent admirer returned to the district so consequently that was the reason.

Are haystacks the modern parking grounds? You didn't think we saw you — Well, there is very little that misses our eyes.

We are glad to see that a prominent curler knows a good remedy to help the young lads of the town. It seems as if some of the 'old boys' forget the days of their own youth.

We note that one of our worthy citizens has placed a lady's picture in the window of his car. There must be a reason.

Settlement Of Refugees

It would appear to be highly desirable that some further consideration be given to the manner in which Czech-Slovakian, Hungarian and Jewish refugees disinherited in German Sudetenland and other European territories since they came under Hitler's suzerainty, are to be allowed to settle in this country, than has apparently been given to this problem to date.

Comparatively little information as to this movement, apparently planned for this spring, has been given to the public to date, either because the federal government has not completed its plans after its negotiation with the British government, or because it is not deemed desirable to announce details as yet.

It dispatches to the daily press from Prague and Ottawa are authentic it is intended to bring to this spring approximately 3,000 Czech-Slovakians, about 800 families; that "most of them are agriculturists"; that most, perhaps all of them have money; that some of them are to be settled in colonies with the Peace River country in Alberta and Northern Saskatchewan cited as probable destinations; that settlement of these newcomers will be left to the colonization departments of the trans-continental railways and that the movement is being undertaken with the co-operation of the provincial governments. In addition to that the Prague despatch also states that another group of 1,500 consisting largely of former Hungarian Socialists, most of them farmers, also is preparing to emigrate soon to an unannounced destination. Of this group, according to the cable story, 500 are Jews.

A Different Picture

This is quite a different picture to that presented earlier in the winter when the question of making some provision for the settlement in Canada of disinherited European nationals was first discussed and ventilated through the press of the country.

At that time the Western Canadian public was led to believe that consideration was being given to the transfer to this country of Czech-Slovakian, Hungarian and Jewish professional men and small manufacturers and industrial workers. It was pointed out that these people were in a position to make a valuable contribution to the economic and industrial life of the country. They were to include medical men of high calibre, trained research workers in the field of chemistry and other sciences as well as men who were in a position to start industries which are little known or not practised at all in this country and which would give employment to others. They would not be in competition with established industry and some of them it was represented, would bring with them substantial amounts of capital.

Now, however, it appears that Western Canada, at least, is to absorb, not professional men of high attainments and industrialists and industrial workers and research men, but refugee farmers who, under existing conditions, will have to produce commodities of which there is a glut in the world markets or commodities which must be sold in restricted or non-existent local markets, if they are to do anything more than maintain a bare subsistence.

What the reaction of the governments of the two provinces most concerned will be to this latest development in European immigration plans, it is difficult to say at this time of writing, for presumably despite the announcement that settlement plans are to be carried out with the co-operation of the provincial governments, the governments of Saskatchewan and Alberta have not been consulted. Premier Aherhart was quoted as saying: "No agreement has been entered into with this government with any authority as to these people coming to Alberta. A fuller statement will be made when I have ascertained . . . the nature of the report." Premier Patterson of Saskatchewan told the newspaper reporters: "I know absolutely nothing about it. We've never been asked to take any by anyone."

Retarding Assimilation

The wisdom of bringing in more agriculturists to settle on Western Canadian farm lands, at least until such time as some of the major production and marketing problems show some sign of being resolved, is highly debatable and is seriously questioned in many quarters, but on the subject of the advisability of perfecting plans which provide for the settlement of non-English speaking peoples on the land in colonies there can be no two opinions in the west.

The great majority of the people of the west are agreed that the problems faced by them must be settled in a spirit of unification and this process of unity must necessarily be slowed up if nations are to be allowed to settle on bloc, forming their own communities and delaying the progress of assimilation into a national entity. These people undoubtedly have many fine qualities, including evidently a passionate devotion to democratic ideals, otherwise they would not be in the unfortunate predicament in which they find themselves.

To that extent, undoubtedly, they are very desirable settlers, but it is also desirable, once they have adopted this country as their home, that they absorb Canadian ideals and ideas as speedily as possible and this can best be done by settling them in such a manner that they must necessarily rub shoulders daily with established Canadians. Colonization in large settlements will retard this important development for many years, perhaps for decades, possibly for generations.

A Fitting Name

No more fitting name than "Saunders" could be given the new wheat strain developed by Canadian scientists. But whether this is bestowed or not the name of Saunders will always be linked to the story of seed development in Canada.

Collects Early Editions

Boy In Thamesville, Ont., Has Newspaper Printed In 1795

Kenneth Kenney is a 15-year-old Thamesville lad with a unique hobby. He collects old newspapers.

Included in Master Kenney's novel collections are specimens of three of the earliest publications to find their way into this country. Well-served despite their age, they tell their own story of journalism's early trials, successes and failures.

"These three oldest newspapers were given to me by my mother and they started me in the hobby of collecting papers," explained Kenneth. "They've been in the family so long, nobody's certain where they came from."

The three which attract most attention in Kenneth's collection are specimens of *The Glasgow Courier*, dated Saturday, September 5, 1795; *The Times*, printed in London, Eng., Wednesday, October 3, 1798, and *The Michigan Essay or the Impartial Observer*, dated August, 1809.

The Michigan Essay is volume one, number one of a Detroit publication, printed and published by James M. Miller. Large share of the journal is in French, with many misprints and "it's" used instead of "s's".

How You May Reduce Varicose or Swollen Veins—Heal Ulcers

A Simple Home Treatment

The world progresses. Today many minor ailments are being cured more quickly. If you have varicose veins or swollen legs, you can bring them back to normal size and if you are wise you will do so.

Just get an original bottle of *Moore's Lymphatic*. It is a simple, safe, and effective remedy for varicose veins, swollen legs, and ulcers. It is a simple, safe, and effective remedy for varicose veins, swollen legs, and ulcers.

People who want to reduce varicose veins or swollen legs should not hesitate to use *Moore's Lymphatic*. It is a simple, safe, and effective remedy for varicose veins, swollen legs, and ulcers.

People who want to reduce varicose veins or swollen legs should not hesitate to use *Moore's Lymphatic*. It is a simple, safe, and effective remedy for varicose veins, swollen legs, and ulcers.

Flying Laboratory

Oxygen Mask Is Used In Stratospheric Flight

A flying laboratory raced non-stop from Minneapolis to Boston at an average altitude of 20,000 feet in what Mayo clinic scientists described as a completely successful test of a new type oxygen mask designed to make practicable sub-stratospheric flight and air flying at normal altitude.

Mal Freeburg, pilot of the commercial passenger plane which carried 10 other persons, including his wife, said the flight was made at an average speed of 250 miles an hour for 1140 miles. He described it as a record for fully-loaded passenger planes flying at that altitude without dual-stage supercharged motors. The plane left Minneapolis at 10:30 a.m. C.S.T., and arrived at Boston airport at 4:29 p.m. E.S.T., an elapsed time of four hours and 50 minutes.

The passengers, wearing masks which look like football players' nose-guards with bulb attached, said they were completely comfortable as they ate a chicken dinner, drank and talked while the plane hurtled through the stratosphere, sometimes at a height of 23,000 feet.

The four-ounce rubber masks, small enough to be tucked into a handbag, were attached to oxygen feedlines. The wearer breathed the oxygen through his nose. Carbon dioxide was exhaled through the nose into a bladder-like rubber bulb fastened below the mask. When the wearer next inhaled, a quantity of carbon dioxide was returned to the lungs "thus stimulating deep breathing," explained Dr. W. R. Lovelace, one of the three Rochester, Minn., scientists who designed the mask.

When East Meets West

Japanese Had Last Word With New York Bank Teller

One of those meaningless little incidents took place the other day at the Fifth Avenue branch of the Guaranty Trust Company, New York, when a Japanese gentleman tried to cash a check. "I'm sorry, I can't cash this," the paying teller said. "I don't know you." With Oriental calm the Japanese took back his check, stepped close to the cage, and muttered, "I don't know YOU, either." He then bowed, presumably to his watching accessories, and left.

In 1937 Jamaica exported 27,000,000 bunches of bananas, a record.

Mother's Standby in Treating CHILDREN'S COLDS

FOR RELIEVING DISCOMFORTS OF COLD, COUGHS AND NIGHT CROUP, rub Vicks VapoRub on throat, chest and back at bedtime. Its powerful vapor action relieves local congestion and helps the youngster relax into restful sleep. FOR COUGHING and irritated throat due to colds, rub VapoRub on the child's throat. It melts, soothes the throat with comforting medication. Also massage on throat and chest. FOR HEAD-COLD "sniffles" and misery, melt a spoonful of VapoRub in bowl of boiling water. Have the child breathe in the steam. VapoRub is the "Vapo" in Vicks VapoRub. Vicks VapoRub is the "Vapo" in Vicks VapoRub.

Because They Lost It

Settlers Coming From Sudeten Will Appreciate Their Liberty

Not one—not even those political acrobats who denounce immigration in all its shapes and forms—could quarrel with the decision of Ottawa to allow several hundred Sudeten German families to come to Canada this spring to settle on Canadian farms.

Each of these families will have at least \$1,500, provided by the Czech government, and they must prove they are good farmers.

These people are "refugees" in one sense, but there is nothing shabby about this label for them. They fled the Sudeten area when the shadow of the Swastika fell over it; when the democracy which had adopted them became merely another province of the Nazi Reich.

They will thus have a full appreciation of what liberty means, perhaps a better one than some of the neighbors they will find in a new land. For they know that it means to have lost it—Hamilton Spectator.

National Film Board

Government Films Shown To 40,000,000 People Each Year

Canadian government films are shown to 40,000,000 people in Canada and other countries each year, Hon. W. D. Euler, trader minister, told the House of Commons when his bill to create a national film board was under consideration. The board would be the central authority for direction of moving picture work on behalf of different departments of government and for the distribution of films.

At present more than 6,000 copies of Canadian films were in active circulation in more than 30 different countries, said Mr. Euler. Last year the films were shown to audiences totalling 4,000,000 in the United Kingdom.

Was Badly Needed

Bothered by grapefruit juice shooting in her eyes while preparing and eating it a woman has invented a shield that leaves space for inserting knife or spoon and keeps the juice where it should be.

"Why didn't you catch that guy? You had bloodhounds!"

"Well, could I help it if he was anemic?"

Riddle Of Gravitation

Prof. Einstein's New Theory May Explain Many Mysteries

Professor Albert Einstein, the scientist, announced he had discovered a new solution of the riddle of gravitation.

The riddle is the unknown cause of gravitation and its connection with electricity, matter and magnetism. Professor Einstein kept the solution secret, explaining that it would be tested with actual experiment.

Einstein thinks he has discovered the clue to a long-sought single law that will explain the structure of the entire universe and all the mysteries of matter and radiation.

Gravitation is the missing link. Everything else, scientists have suspected, will become clear if someone can learn how gravitation originates.

Science already has proof that all matter is made of discrete particles which seem to be electricity. It knows how electricity travels through space and matter. It knows that wherever there is electricity, magnetism appears, and vice versa.

It knows that both electricity and magnetism travel in the form of waves, although seeming to be made of particles, that both can spread the speed of light, and that both spread in the same way as the same as gravitation has a field.

Finally, science has evidence that all rays, from light to radio and cosmic, and including heat, are only electro-magnetic waves. There are a few laboratory experiments proving that these rays are converted into solid matter.

In this way the mystery of the source of matter and of energy has seemed complete, all except fitting gravitation into the puzzle.

Two years ago Einstein announced that he had a tentative solution which he described as the idea that a particle of solid matter was a "bridge between shells of space."

A year ago Einstein, in a book, announced evidence that the known fields—that is, electricity, gravitation and magnetism—may be the only reality. Everything else, including matter, would be some combination of the fields.

News Is Appreciated

German People Like The B.B.C. Foreign Language Programs

Letters written in German or English trickle into the British Broadcasting Corporation's offices day by day, routed from German cities via Shanghai, New York and other far off places, expressing appreciation of the new foreign language broadcasting.

The B.B.C. spent \$183,000 last year on reading news in French, German and Arabic, hoping to offset effects of totalitarian broadcasts in which news is slanted for political purposes.

Foreign language broadcasting was started two years ago when Italy was courting the Arabic world with newscasts and lectures designed to discredit Great Britain in the eyes of the new east.

German and French broadcasts were added with the intention of giving Germans "straight" news which they seldom get either in their newspapers or by radiocasts originating in their own country.

Germans who write the B.B.C. say they and their friends listen eagerly to the broadcasts despite the fact the practice is frowned upon by Nazi authorities.

Recent threats by Chancellor Hitler that Germany would "retaliate" if the broadcasts were continued had no effect on the B.B.C.

An American woman who was recently awarded 10,000 pounds' damages against a man after a car accident, was afterwards married to him. It seems that he married her for his money, says Punch.

COUGHS
DUE TO
COLDS

Distressing cold in chest or throat, never safe to neglect, quickly eases up when soothing, warming Musterole is applied.

Better than a mustard plaster, Musterole gets action because it's NOT just a salve. It's a "counter-irritant"—stimulating, penetrating, and helpful in overcoming local congestion.

Used by millions for 30 years. Recommended by many doctors and nurses. Made in Canada, in three strengths: Regular Strength, Children's (mild), and Extra Strong. Approved by Good Housekeeping Bureau. All druggists, 40¢ each.

Promising Artist

Edmonton Youth Gives Exhibition Of Paintings In England

Eric Freifeld, a youth who washed dishes in a Winnipeg cafe last year, now in England, is giving an exhibition of water colors at a gallery in Bond street, swank centre of art and fashion. He is 19 years old, but his 39 paintings indicate he has already done a bit of travelling.

Geographically, their range is from Vancouver to Nice on the Riviera. Russian born, Freifeld went to western Canada with his family when a small child, and was brought up in Edmonton. He came to England last year in a cattle boat with some paintings and very little money.

In London he won a scholarship at an art school and hopes to be able to stay in England for another year or so.

He is a high-spirited youth, full of bounce and enthusiasm and sure of his gift. He has priced his pictures at five to 29 guineas—not dear for Bond street, but not cheap either.

The style of his paintings is impressionistic. He chooses subjects like Edgworth shires, London warehouses, wash-day at Nice and Lambeth market, and makes of them pictures one could live with. One of them hangs in Canada House.

Eric Freifeld seems to be a young man of promise.

For Sea Rescue

Suggest International Agreement For Indemnity For Saving Lives

Rescue of ten persons from the British flying boat Cavalier is expected by aviation and maritime attorneys in New York to give impetus to a new international agreement to pay indemnity for rescue of lives at sea.

For many years it has been an accepted rule that indemnity for the rescue of a ship applies only to property salvaged and expenses incurred in making the rescue but not to lives. The 1910 convention on salvage of vessels at sea declares it a "duty" to assist persons in danger at sea.

In the last few years' air navigation has created a new situation. It is pointed out that planes carry little else but lives, personal property and postal matter, which are excluded under present international indemnity agreements.

Underground Mail

New York Has Pneumatic Tube System For Quick Despatch

The transferring of mail in New York City from postoffice to postoffice is quite a problem. Mail trucks would move at a snail's pace through the congested traffic. So the postoffice devised a pneumatic tube system to rush the mail through.

Underneath the "sidewalks of New York" are over 50 miles of pneumatic tubing. The tubing even goes under the East river to Brooklyn post-offices. These underground tubes carry about half of the mail traffic in the city. The mail is put into shells at a central tube station and shot by compressed air to branch offices at a 25 to 30-mile-an-hour clip. Over 150,000 letters may be sent an hour by this unique means.—The Commentator.

President Roosevelt has nominated Laurence A. Steinhardt, of New York, as U.S. ambassador to Soviet Russia to fill a post vacant since last May. The nomination fulfilled previous disclosures that the appointment was impending.

Since the Norman conquest in 1066, there have been 29 monarchs, four of them women, in England. On 16 occasions, the throne passed from father to eldest surviving son.

An order for 70,000,000 wooden ice cream spoons has been placed with a Nova Scotia concern.

Snow may melt and fall as rain, but raindrops do not change into snow which condenses from water vapor.

What gets Hitler and Mussolini so busy about the democracies more than anything else is that with their incredible lack of efficiency they still have all the money.

In Atlanta, Ga., whenever there is a fatal traffic accident, a black flag is hoisted in the centre of the city and hangs there 24 hours.

Snow may melt and fall as rain, but raindrops do not change into snow which condenses from water vapor.

In Atlanta, Ga., whenever there is a fatal traffic accident, a black flag is hoisted in the centre of the city and hangs there 24 hours.

There was a stifled wail behind him but he did not look around. He busied himself with directions. Where—granted that he must forego the pleasure of pitching her out in mid-air—was the first place he could land her? Anywhere he could get his ship down with a semblance of safety!

Unless he carried her all the way to Los Angeles—or Glendale, which was his destination—and that was unthinkable—he must apparently depart to a place called Fresno.

A stealthy look, presently, showed him that she had settled herself in a seat, a blanket wrapped around her. Her face was pressed against the window, but she turned and saw him and started to rise again.

"I must tell you—" she began urgently, her voice shrill above the motor. "You must listen to me! I want—I want—I they gave me something—" She started to stand up, to come forward again.

He made an imperative gesture. "Keep back. Do not come here. Stay where you are."

She dropped beside the window, huddling under her blanket, peering out into the quiet sky.

CHAPTER VI

Miss Pennington always marvelled that her charge never wept, even in childhood, but Sarah Lynn was crying now, bitterly and uncontrollably, salt tears running down her mouth, shivering under her woolly coverings.

In spite of the cold, the stinging, biting air, she was seared and shrivelled by the flame of Gunnar Thorwald's scorn and contempt.

"Keep away from me, drunken fool!"

The hideous irony of it—Sarah Lynn, flat-tire in the mad tempo of fourth generation Danavale because she would never take a drink! She looked at his rigid shoulders, at the relentless angle of the head in the sternly classic helmet and absolved him utterly. Why shouldn't he have believed the worst of her, seeing her there in that loathsome place, heavy-eyed and staggering and babbling?

"I'm not afraid!" she exulted. "I'm not the least particle afraid. I adore it. This won't be the last time—I won't let it be. I'm going to fly all my life. It's fun! It's heavenly! It's the kingdom and the power and the glory!"

There was a bump which threw her forward in her seat, and then they were thumping along over a field, terrestrial again, all glory gone. They turned and drew up presently in front of brightly lighted buildings with a big group of people before them. An attendant came running to meet them.

Gunnar Thorwald did not leave his seat. He spoke through the window.

"Thorwald, San Jose to Glendale."

"Nothing. I land a passenger."

Without looking round, he indicated Sarah Lynn with a motion of his shoulder.

The man opened the door "and thrust in his head. "Getting out, lady?"

"—yes, I suppose—" Sarah Lynn got to her feet, tripping over the blanket, lowering it clumsily into

TAKE THE
"LEAD" FEELING
OUT OF YOUR LEGS

Get More Oxygen In Your Blood and Get the Pay that Sends You Bounding Up the Stairs

People who smother to death die because oxygen has been completely cut off from them. Just as surely you are slowly smothering if your blood lacks red corpuscles, erythrocytes are your oxygen-carriers. They carry the oxygen you breathe in to every part of your system. Without them, your gas-carrying corpuscles, your kidneys, liver, stomach and lungs die slowly. Your body gets pale, flabby, often simply. Your nerves may become jittery—you die. Sooner or later you feel depressed.

What you need is Dr. Williams' Pink Pills. These world-famous pills help make more and better red corpuscles and thus increase the oxygen-carrying power of your blood. Get Dr. Williams' Pink Pills today at your druggist. See for yourself how quickly this little red blood-builder will lift you back your pep.

CHAPTER V—Continued

Gunnar Thorwald, Norwegian ace, was flying in a cold rage. He was hurt, disappointed, deeply disgusted. Jim Allison had failed him utterly, and it was a blow, because he was young enough, in spite of his astonishing exploits, to take himself and his career with great seriousness.

He had come to America very earnestly, pledged to study and learn, to take home all he could gather from the nation's wing, and he had counted confidently on Jim Allison.

"I wouldn't think of asking you to break your rule about never taking women up," the American flier had explained, "under ordinary circumstances, but in this case, if you could possibly make an exception I'd appreciate it no end. You see, the fact is, Ardine—ad of course her husband, too—awfully decent chap, Keaton Dana, rather heavy, perhaps, but a prince"—he added hastily under the bleak young gaze—"are very special friends of mine, and she's set her heart on going up for a spin with you."

"I am sorry," the yellow-haired youth said civilly.

"Makes it pretty awkward for me. I dare say I—well, I stultified a bit about what pals we are, and I'm afraid I let Ardine infer that I could fix it up for her."

"I am sorry," Gunnar said again. "I take no women in my ship."

He might well have expanded his pronouncement to say that he took no women anywhere. Sisterless, cousinless, girl-friendless, rigidly reared by a stern grandmother, he had pledged her and himself to keep his mind wholly upon his work until his career was well established.

The night was clear and calm with excellent visibility; his hop to Los Angeles would be without excitement.

He came swiftly out of his musings as the nose of the plane dropped, the whirr of the motor increased and they leaned toward a downward pitch. He pulled on the stick to regain normal position, wondering what freak of air currents caused

the small disturbance. He was aware of a slight jar. Had he, perhaps, struck a high-flying night bird?

He was immediately in level flight again, eased off on the joy stick and began to re-establish the course which had been briefly abandoned, but directly he released his pressure the nose dropped a second time.

Prairie Chicken Revival

Prairie chicken have been scarce in south for years but Dr. Rowan, of the University of Alberta, believes they are coming back in numbers. There are thousands in the north around Lac la Biche and elsewhere, he said, and next season should show them in sufficient number in the south for an open season. Dr. Rowan also stated that the new Chukar partridge will be popular game birds.

LANFINE DEPOT CLOSED

The east of the Goose Lake line has suffered severely from settlers moving out because of drouth and various services are being discontinued. The station at Lanfine has been closed. In a fifty mile stretch there is now but one bank, that at Oyen. This region was one time closely settled and produced immense quantities of grain. Persistent drouth caused the population to dwindle and there is little prospect of the land again being settled.

Mrs. W. Gallagher and daughter, Patricia are spending a few days with Miss Phyllis DeMaere, on the farm.

Mr. Jas. Duck left for Calgary on Wednesday, where he has obtained work for a few days.

Messrs R. Youngren and W. Cicon, who attended the youth training school at Haana for two weeks, returned Sunday.

Ladies' Card Club

The Ladies' Card Club met Tuesday evening at the home of Mrs. Robinson. Honors went to Mrs. Wilson and Mrs. Lee. The club will meet next week at the home of Mrs. Cooley.

U F A Locals Highly Active, Official Finds

Steady increase in the membership and a general feeling now being manifest that the U F A can weld together all farm people of the province, were commented on today by Norman F. Priestley, vice-president of the United Farmers of Alberta, who returned from a series of meetings in the south.

During meetings at Taber, Lethbridge and Iron Springs, Mr. Priestley met workers representing many districts, discussed organization and found that the government's 1939 wheat policy was being awaited with great interest. Resolutions from the membership and locals are going to Ottawa steadily.

Since the U. F. A. gave up politics last January, numerous district meetings have been held when farmers, livestock men, dairy men, pool and non pool followers U G G members and co-operators have met to discuss general problems. Many similar meetings have been arranged for the near future.

MEETING AT BROOKS

Next Friday, the several locals in the Brooks irrigation district will meet to continue the work of forming themselves into a general co-operative association and will seek wide powers in both buying and selling. The dozen locals in the district boast of approximately 500 members.

Another meeting has been arranged for Eckville, when all farm and dairy organizations in the district will be represented. There will also be members of the Central Alberta Dairy Pool in attendance.

On Wednesday Mr. Priestley will go to Edmonton to attend a

meeting of Edmonton Farmers District Co-operative. The following Monday, the executive of the U F A will gather in Calgary for a regular meeting on Friday evening at 8 o'clock. Dalemead local will convene a meeting.

Tea In Canadian Pacific History

Half an ounce of tea, carried across the Dominion 53 years ago as part of the first transcontinental freight shipment by the newly-completed Canadian Pacific Railway, made history in London, England, recently.

In a small plaid, the tea was displayed in the Canadian Pacific office in Trafalgar Square, as part of the 100th anniversary celebration of Empire Tea. Just enough to provide "tea for two" the sample was traced to the shipment that inaugurated the "All Red Route".

Photos show: (top left) the barque, "W. B. Flint", whose cargo of tea formed the first west to east freight train in 1886; (top right) an early Canadian Pacific freight train crossing Sur-

Marcy Family Wins Close Finish In 'Spiel

In two of the most evenly contested finals of the curling season both main and consolation events of the family bonspiel were played off on Monday night.

In the primary event the Marcy rink comprising Pa Marcy, son Bob, son Frank and Ma Frieberg nosed out the Chalmers entry of Pa Chalmers, son Ted, Ma Chalmers and son Gordon Cory. The game went to 13 ends after regulation time ended in a 8-8 score.

In the consolation event the Desbarnais rink composed of Pa and Ma Desbarnais and Pa and Ma Newby, with the later relaying shots from Calgary, won by a nose. They beat the Galbraith contingent, comprising Pa Galbraith, son

Five Year Plan

Premier Aberhart was in great little last Sunday and his address at Edmonton was a vigorous denunciation of opposition and out lines for future plans. He said that five years from now the government would be able to show 12 great achievements, including the first roads in Canada, first educational system, finest marketing and distribution system, state medicine, ample credit system through treasury branches refund of provincial debts at lower rate, enlargements of province's boundaries northward and trade agreements with other countries.

Howard, Ma Tweed and daughter D-nell by a score of 14-13.

The bonspiel provided some of the best curling sport of the season.
